PROJECTS

Code Atlas | *Python, AST, REST APIs*

- Built a static codebase analysis tool that recursively scans Python projects using Python AST, resolves imports, and constructs directed dependency graphs.
- Implemented architecture, coupling, complexity, code-smell, and explainable risk analysis with 31/31 validation checks passing.
- Developed an interactive dashboard with 5 architecture views, 3 graph layouts, and 4 analysis modes, including source inspection, investigations, and report export.
- Built and maintained an automated test suite with 237 tests covering scanning, dependency resolution, architecture analysis, and API behavior.

Shop Inventory & WhatsApp Automation Tool | *HTML, CSS, JavaScript, Google Sheets*

- Built and deployed a localhost inventory tool used to search 150+ products from live Google Sheets data without a backend.
- Replaced manual price lookups that previously required contacting the owner, reducing lookup delays from 30–45 minutes to immediate browser access.
- Integrated product-level WhatsApp messaging to send product details directly to customers.
- Currently used by shop workers approximately 10–15 times per day.

Telegram Document Processing Bot | *Python*

- Built a Telegram bot supporting 6 document-processing workflows including PPTX-to-PDF, PDF-to-Word, OCR, PDF compression, image compression, and WEBP-to-PNG.
- Implemented per-user workflow state to handle independent file-processing operations.
- Integrated python-telegram-bot, pdf2docx, pytesseract, Pillow, Ghostscript, and LibreOffice.
- Added temporary-file cleanup after processing.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS
Backend & APIs: REST APIs, python-telegram-bot
Databases & Data: MySQL, Google Sheets
Libraries & Tools: Python AST, Pillow, pytesseract, pdf2docx, Ghostscript, LibreOffice
Developer Tools: Git, GitHub, Linux, WSL
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Artificial Intelligence

EDUCATION

B.Tech in Computer Science Engineering | Marwadi University | 5th Semester | Expected 2028
Relevant Coursework: Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems

ACHIEVEMENTS

- Solved 83 LeetCode problems, including 25 Medium problems, with a maximum 52-day active streak.
- Participated in the Adobe Hackathon, completing the initial MCQ and coding assessment rounds.
